Profile

My expertise is in creating visually appealing web pages/API and providing an outstanding user experience. I am dedicated to producing clean, maintainable code.

Skills

MERN STACK — REACTJS, NODEJS, MongoDB, Express

MySQL — Relational Database

Typescript — Nestjs

Projects

Library Management System

Library Management System is an API tailored for use by a library manager. This API will focus on managing books and library members, as well as handling the issuing and returning of books..

News Explorer Application

This is a web application that uses the NewsAPI to fetch and display news articles. The application will have a default home page showcasing top headlines and a search feature for users to find news articles based on specific keywords.

Seazux

- Worked on URL Shortening using MERN stack.
- URL-shortened API services like bit.ly or cutt.ly

chatbot, AltSchool Africa

- Demonstrating a bi-directional communication channel between a client and a server.
